Tyre Pressure Gauge (TPG)

Specifications

Supply Voltage: 6-25Vdc
Current Consumption: 25mA
Current consumption in Idle mode: 5mA
Pressure connection: Hose
LCD screen viewing area: 25x50mm
Housing dimensions: 80mm diameter
Customization available please contact

The TPG is a Digital Tyre pressure gauge specifically designed but not limited to Tyre pressure measurement. Its simplistic design allows it to replace older analogue pressure dial gauges. The Large clearer display make pressure easier to view.

Key features and advantages

- LED back light flash for alarm at predetermined levels
- Dashes across display for transient pressure spikes (user definable)
- Auto Zero function to adjust for any sensor zero drift
- User Selectable Pressure units PSI KPA and Bar
- IDLE mode when down time automatically detected, automatically wakes up
- Tyre inflation counter(example of custom firmware available)
